RECOMMENDED EQUIPMENT

CERVICAL COLLAR

The multifit Cervical Collar is the “Gold Standard” for cervical spine immobilisation, superior to other soft and rigid collars in rigorous scientific studies.

The latest development is the fully adjustable collar, which incorporates all adult sizes and can be set for the appropriate neck size at the injury site.

HEAD IMMOBILISATION DEVICE (“HEAD-BED”)

The Head Bed is used with the Scoop Stretcher and Cervical Collar to secure the head and neck .

By doing this, an attendant is no longer occupied maintaining Manual Inline Support of the head and neck.

Firm cushioning under and at the sides of the head are complemented by the elasticised straps across the forehead and/or the front of the Cervical Collar.

COMBICARRIER SCOOP STRETCHER

Scoop Stretchers are another practical tool for safely moving a potential spinal injury.

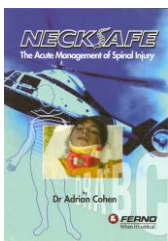

The CombiCarrier Scoop Stretcher is easily divided in half along its length, can be “scooped” under the patient from each side without the risk of further movement and then locked together for rigid and stable stretcher transport, and floats for use in aquatic environments.

A Scoop Stretcher should be used instead of a Jordan Frame.

NECKSAFE TEXT BOOK and TRAINING COURSES

The definitive text on the Acute Management of Spinal Injuries.
Over 100 pages plus 60 illustrations

NeckSafe Courses are run regularly for lifeguards, sports trainers, physiotherapists, first-responders and the general public
